To find the interest of any particular sum for any certain time, multiply the sum by the number of the months, take one half of the product, and you will find the two right hand figures to be cents—the remainder on the left hand are dollars, which is the answer. If there be cents in the sum, after you have multiplied as above, you will find the two right hand figures to be fractions, the two next cents, and the remainder in dollars.

## EXPLANATORY REMARKS.

It will be perceived, that, to the rates of duty imposed on goods, wares, and merchandise, imported in vessels of the United States, and in foreign vessels, placed on an equality with vessels of the United States, by treaty stipulations, or special acts of Congress, an addition of ten per cent. has been made in the case of importations in other foreign vessels, except to the rates on teas from China, the law in that instance making a specific and a greater discrimination than 10 per cent.

By "other foreign vessels," are not to be understood French vessels, when importing articles of the growth, produce or manufacture of France, the duties on which are to be regulated by the treaty with that country, signed the 24th of June, 1822; according to which, such articles, thus imported, are at present liable to an additional duty, not exceeding \$375-100 per ton of merchandize, over and above the rates paid on similar articles, when imported in vessels of the United States. But importations in French vessels, of articles, not the growth, produce, or manufacture of France, are liable to the usual discriminating duty of ten per cent, between Importations in foreign and Importations in American vessels.

## REGULATIONS RESPECTING DRAWBACKS.

In every case the duties must amount to \$50 or more. And in every case of entry of merchandize for drawback, and the same regularly shipped under the inspection of an officer, and gauged, weighed or measured, as the case may require, 20 days from the clearance of the vessel is allowed by law for signing bonds, to produce certificates of landing out of the United States. Merchandize, to be entitled to benefit of drawback, must be shipped within twelve calendar months from the date of importation.

Merchandize for drawback, cannot be imported to the dominions of any foreign state, immediately adjoining the United States.

All goods must be exported in the original package, without any change whatever, except liquor in casks, coffee in casks or other packages, and cocoa in casks or other packages, which may be filled up from other packages, of the same importation: or be put into new packages corresponding therewith, and marked and numbered as the original one; and in case the original package shall, in the opinion of the officer appointed to examine the same, be so injured, as to be rendered unfit for exportation, and in no other case; and all this must be done under the inspection of a proper officer, appointed by the collector, and naval officer, &c

Drawback not allowed on goods imported in vessels from the dominions of a power to which the vessels of the United States are not permitted to trade.

Nor of duties for the amount of the additional duty on merchandize imported in vessels of the United States.

Drawback not allowed on foreign dried and pickled fish, and salted provisions. Nor of fish, oil, or playing cards.

✎ The editor would suggest to the Secretaries of the incorporated bodies, and other public societies in this State, the expediency of forwarding to him as soon after the annual elections as convenient, a list of officers chosen. This would insure their insertion in the Register, and in their appropriate place. He often finds it extremely difficult, and sometimes impossible, to procure such articles without incurring an expense which the profit of the work will not justify. If any, therefore, are omitted, he wishes it to be understood, it is not in consequence of negligence or want of due attention on his part. The public utility of the work is felt and acknowledged by the enlightened part of the community; and from respect to their opinion, the above apology and remarks are made.—The important assistance which several gentlemen annually render in the compilation of the work, demands his gratitude and thanks; and a continuance of their valuable favors is respectfully solicited.

To find the interest of any particular sum for any certain time, multiply the sum by the number of the months, take one half of the product, and you will find the two right hand figures to be cents—the remainder, on the left hand are dollars, which is the answer. If there be cents, in the sum, after you have multiplied as above, you will find the two right hand figures to be fractions, the two next cents, and the remainder in dollars.

## EXPLANATORY REMARKS.

It will be perceived, that to the rates of duty imposed on goods, wares and merchandize, imported in vessels of the United States, and in foreign vessels placed on an equality with vessels of the United States, by treaty stipulations, or special act of Congress, an addition of ten per cent. has been made in the case of importations in other foreign vessels, except to the rates on teas from China, the law in that instance making a specific and a greater discrimination than ten per cent.

By "other foreign vessels," are not to be understood French vessels, when importing articles of the growth, produce, or manufacture of France. the duties on which are to be regulated by the treaty with that country signed the 24th of June 1822; according to which, such articles,

thus imported, are at present liable to an additional duty, not exceeding \$375-100 per ton of merchandize, over and above the rates on similar articles, when imported in vessels of the United States. But importations in French vessels, of articles, not the growth, produce, or manufacture of France, are liable to the usual discriminating duty of ten per cent. between importations in foreign and importations in American vessels.

### *Regulations respecting Drawbacks.*

In every case, the duties must amount to \$50 or more. And in every case of entry of merchandize for drawback, and the same regularly shipped under the inspection of an officer, and gauged, weighed or measured, as the case may require, 20 days from the clearance of the vessel is allowed by law, for signing bonds, to produce certificates of landing out of the United States. Merchandize, to be entitled to benefit of drawback, must be shipped within twelve calendar months from the date of importation.

Merchandize for drawback, cannot be imported to the dominions of any foreign state, immediately adjoining the United States.

☞ All goods must be exported in the original package, without any change whatever, except liquor in casks, coffee in casks or other packages, and cocoa in casks or other packages, which may be filled up from other packages of the same importation, or be put into new packages corresponding therewith, and marked and numbered as the original one; and in case the original package shall, in the opinion of the officer appointed to examine the same, be so injured as to be rendered unfit for exportation, and in no other case. And all this must be done under the inspection of a proper officer appointed by the collector, and naval officer, &c.

Drawback not allowed on goods imported in vessels from the dominions of a power to which the vessels of the United States are not permitted to trade.

Nor of duties for the amount of the additional duty on merchandize imported in vessels of the United States.

Drawback not allowed on foreign dried and pickled fish, and salted provisions. Nor of fish, oil, or playing cards.

Provided the quantity exported shall be 150 gallons, and in vessels not less than 30 tons burthen.

*Sect. 4th of Act passed 20th of April, 1818.*—And be it further enacted that no drawback shall be allowed of the duties paid on any wines or spirits which shall be imported into the United States after the first day of June, 1818, unless such wines or spirits shall have been deposited in public or other stores, under the provisions of the act, and there kept, from their landing to their shipment.

 To find the interest of any particular sum for any certain time, multiply the sum by the number of months take one half of the product, and you will find the two right hand figures to be cents—the remainder, on the left hand are dollars, which is the answer. If there be cents, in the sum, after you have multiplied as above, you will find the two right hand figures to be fractions, the two next, cents, and the remainder in dollars.

3. The exercise and enjoyment of religious profession and worship without discrimination, shall forever be free to all persons in this State, provided that the right hereby declared and established shall not be so construed as to excuse acts of licentiousness, or to justify practices inconsistent with the peace and safety of the State

### *Article Second.*

#### OF THE DISTRIBUTION OF POWERS.

The powers of government shall be divided into three distinct departments, and each of them confided to a separate magistracy—to wit,—those which are Legislative, to one—those which are Executive, to another, and those which are Judicial, to another.

### *Article Third.*

#### OF THE LEGISLATIVE DEPARTMENT.

§ 1. The Legislative power of this State shall be vested in two distinct houses or branches, the one to be styled THE SENATE, the other THE HOUSE OF REPRESENTATIVES, and both together THE GENERAL ASSEMBLY. The style of their laws shall be *Be it enacted by the Senate and House of Representatives in General Assembly convened.*

2. There shall be one stated session of the General Assembly to be holden in each year alternately at Hartford and New Haven, on the first Wednesday of May, and at such other times as the General Assembly shall judge necessary—the first session to be holden at Hartford—but the person administering the office of Governor, may on special emergencies, convene the General Assembly at either of said places, at any other time. And in case of danger from the prevalence of contagious diseases in either of said places, or other circumstances, the person administering the office of Governor may, by Proclamation, convene said Assembly at any other place in this State.

3. The House of Representatives shall consist of Electors residing in towns from which they are elected. The number of Representatives from each town shall be the same as at present practised and allowed. In case a new town shall hereafter be incorporated, such new town shall be entitled to one Representative only: and if such new town shall be made from one or more towns, the town or towns from which the same shall be made, shall be entitled to the same number of Representatives as at present allowed, unless the number shall be reduced by the consent of such town or towns.

4. The Senate shall consist of twelve members, to be chosen annually by the electors.

5. At the meetings of the Electors, held in the several towns in this state, in April annually, after the election of Representatives, the electors present shall be called upon to bring in their written ballots for Senators. The presiding officer shall make out duplicate lists of the persons voted for, and of the number of votes for each, which shall be certified by the presiding officer—one of which lists shall be delivered to the town clerk, and the other within ten days after the said meeting shall be delivered under seal, either to the Secretary, or to the Sheriff of the County in which said town is situated—which list shall be directed to the Secretary, with a superscription expressing the pur-

port of the contents thereof. And each Sheriff who shall receive such votes, shall within fifteen days after said meeting, deliver, or cause them to be delivered to the Secretary.

6. The Treasurer, Secretary and Controller for the time being, shall canvass the votes publicly. The twelve persons having the greatest number of votes for Senators, shall be declared to be elected. But in cases where no choice is made by the electors in consequence of an equality of votes, the House of Representatives shall designate by ballot which of the candidates having such equal number of votes, shall be declared to be elected. The return of votes and the result of the canvass, shall be submitted to the House of Representatives, and also to the Senate, on the 1st day of the session of the General Assembly, and each House shall be the final judge of the election returns and qualifications of its own members.

7. The House of Representatives when assembled shall choose a Speaker, Clerk, and other officers. The Senate shall choose its Clerk, and other officers, except the President. A majority of each House shall constitute a quorum to do business—but a smaller number may adjourn from day to day, and compel the attendance of absent members in such manner, and under such penalties as each House may prescribe.

8. Each House shall determine the rules of its own proceedings, punish members for disorderly conduct, and with the consent of two thirds expel a member, but not a second time for the same cause, and shall have all other powers necessary for a branch of the Legislature of a free and independent State.

9. Each House shall keep a Journal of its proceedings, and publish the same when required by one fifth of its members, except such parts as in the judgment of a majority require secrecy. The yeas and nays of the members of either House shall at the desire of one fifth of those present, be entered on the journals.

10. The Senators and Representatives shall in all cases of civil process be privileged from arrest, during the session of the General Assembly, and for four days before the commencement, and after the termination of any session thereof. And for any speech or debate in either House, they shall not be questioned in any other place.

11 The debates of each House shall be publick, except, on such occasions as in the opinion of the House may require secrecy.

*Article Fourth*

OF THE EXECUTIVE DEPARTMENT.

§ 1. The supreme Executive power of the State, shall be vested in a Governor, who shall be chosen by the electors of the State and shall hold his office for one year from the first Wednesday of May next succeeding his election, and until his successor be duly qualified. No person who is not an elector of this State, and who has not arrived at the age of thirty years, shall be eligible.

2. At the meetings of the electors in the respective towns in the month of April in each year, immediately after the election of Senators, the presiding officers shall call upon the electors to bring in their ballots for him whom they would elect to be Governor with his name fairly written. When such ballots shall have been received, and counted in presence of the Electors, duplicate lists of the persons voted for, and of the number of votes given for each, shall be made and certified by the presiding officer, one of which lists shall be deposited in the office of the Town Clerk, within three days, and the other within ten days after said election, shall be transmitted to the Secretary or to the sheriff of the County, in which such election shall have been held. The Sheriff receiving such votes, shall deliver or cause them to be delivered, to the Secretary, within 15 days next after said election. The votes so returned shall be counted by the Treasurer, Secretary and Controller, within the month of April. A fair list of the persons and number of votes

given for each, together with returns of the presiding officer, shall be, by the Treasurer, Secretary and Controller, made & laid before the General Assembly, then next to be holden, on the first day of the session thereof, & said Assembly shall after examining the same, declare the person whom they shall find to be legally chosen and give him notice accordingly. If no person shall have a majority of the whole number of said votes, or if two or more shall have an equal and the greatest number of said votes, then said Assembly on the second day of their session, by joint ballot of both houses, shall proceed without debate to choose a Governor from the list of the names of the two persons having the greatest number of votes, or of the names of the persons having an equal and highest number of votes, so returned as aforesaid. The General Assembly shall by law, prescribe the manner in which all questions concerning the election of a Governor, or Lieut. Governor, shall be determined.

3. At the annual meetings of the Electors immediately after the election of Governor, there shall also be chosen in the same manner as is herein before provided for the election of Governor, a Lieut. Governor, who shall continue in office for the same time, and possess the same qualifications.

4 The compensations of the Governor, Lieut. Governor, Senators, and Representatives shall be established by law, and shall not be varied so as to take effect until after an election, which shall next succeed the passage of the law establishing said compensations.

5. The Governor shall be Captain General of the Militia of the State, except when called into the service of the United States.

6. He may require information in writing from the officers in the executive department, on any subject relating to the duties of their respective offices.

7 The Governor, in case of a disagreement between the two Houses of the General Assembly, respecting the time of adjournment, may adjourn them to such time, as he shall think proper, not beyond the day of the next stated session.

## THE PUBLISHER'S NOTICE

The publication of the present number of the "Annual State Register" has been delayed, in order that complete returns from every town in the State might be received, and inserted. Some of our correspondents have neglected giving us the necessary information, and others were more dilatory than was to have been expected. In anticipation of the publication for 1830, the publisher would respectfully suggest to those who have been in the habit of furnishing matter for this work, that they forward him early in the ensuing fall the usual information—to secretaries of incorporated companies—of Academies, &c. he would be extremely obliged for returns of the officers of their respective institutions (free of expense) A compliance with these requests will insure the correct insertion of their officers in the Register. The publisher renders his acknowledgements and thanks to his many correspondents, and to all who have assisted him in this work.

ENFIELD.—The industrious and peaceable society of Shakers is located in the north-east part of Enfield. There are 262 persons included in five families, who own and improve about 4000 acres of land, ten acres of which is cultivated as a garden. In addition to this the society own 1 Grist Mill, (recently erected) 1 Tannery, 1 Triphammer Shop, in which is a machine for drawing lead aqueducts, 1 Carding Machine, a machine for jointing staves for pails, carried by water, a Saw Mill and 3 Cider Mills, one of which is on the new principle of a cylendar.

The society keep about 70 cows, 12 or 14 yoke of oxen, 12 horses and a large number of sheep and young cattle.—As their land is better adapted to grain than grazing, they do not keep so large a dairy as some other societies.

They have a Church in which they perform public worship, 70 feet by 50, two stories high.

KENT.—There are in this town three blast Furnaces, which turn out weekly between 60 and 70 tons of Pig Iron ; four blooming and refining forges, and one card Factory. Many excellent mill seats on the Ousatonic, a never failing stream, remain unoccupied in Kent.

SOUTHBURY. This town has been pronounced the richest in minerals of any in the country. It has attracted the attention of Mineralogists who have taken specimens of petrefaction, rose quartz, &c. in large quantities to various parts of the world.

"The incidents in this work, are well selected and arranged; the style is sufficiently elevated and always perspicuous; and the volume will be found interesting and useful, not only in academies and common schools, but in private families. The plan of making Ecclesiastical History the subject of attention and recitation in the higher schools, is obviously important, and we know of no work more suitable to be adopted as a text book, than the one before us."

"The recommendation below it gives us much pleasure to insert. We believe it will be found just, and no more than just. We say this not from our own knowledge, for we have no claims to authorize us to criticize such a work; but we say it on the authority of those whom we think to be good judges.

### THE AMERICAN PSALMODY.

Having examined the above work, edited by Mr. Elam Ives and Mr. Deodatus Dutton, we most cordially embrace the present opportunity of recommending it to the attention of the different religious congregations of our State. It contains the best selection of Tunes, Anthems, and Set-pieces, and the most perfect system for teaching Musical Elocution, that, to our knowledge, has ever appeared in this country.

### THE SCHOOL DICTIONARY.

Designed for the use of Academies and Common Schools  
in the United States.

BY THE REV. WM. W. TURNER,

Instructor in the American Asylum.

*In 1 vol. 18mo.*

The following is a copy of a letter from the Rev. Mr.  
Gallaudet.

"The School Dictionary, by the Rev. William W. Turner, I have examined, and consider as entitled to a high rank among the improved books which are now, to some extent prepared for our academies and common schools. The sentiments expressed in the Preface are judicious and correct, and deserve the serious attention of all who are concerned in the education of youth. The happy selection of words, in this Dictionary, the general simplicity and clearness of the definitions, and especially the introduction under many of the words of appropriate *illustrative examples*, all conspire to render the volume deserving of a conspicuous place among those comparatively very few elementary works which are designed to aid in the accomplishment of the important object of making our youth more familiar and accurately acquainted with their mother tongue.

T. H. GALLAUDET.

*Principal of the America Asylum for the Education of the  
Deaf and Dumb.*

## PETER PARLEY'S METHOD OF TEACHING GEOGRAPHY TO CHILDREN.

With nine Maps and seventy-five Engravings, principally  
for the use of Schools.

*The Journal of Education says,*

This work is well calculated to answer the purpose for which it is written, viz. to teach the first steps in geography. Such a work is much wanted, there being no one, either expressly designed for, or suited to this end. There are several valuable works for more advanced scholars, but none that is calculated to help the child easily and agreeably over the somewhat difficult grounds which lie between the primary reading lessons, and this popular and useful portion of juvenile study.

The neatness and clearness of the maps, the abundance of the illustrative cuts, and the free and colloquial style of Mr. Parley, together with the attractive qualities of the white paper and large print, are calculated to make the book a favorite with pupils, and we trust, with their teachers. It appears to us that schools which have the use of a book like this, must profit by it in the more rapid and thorough progress of its pupils, and as we esteem every thing that promises advantage to youth of importance, we commend this book to them, who, with ourselves, are interested in the cause of education.

## NATIONAL SPELLING BOOK,

Containing rudiments of Orthography and Pronunciation  
on an improved plan, by which the sound of every syllable  
is directly shewn, with progressive reading lessons, de-  
signed for the use of schools in the United States.

By B. D. EMERSON,

*Principal of the Adams Grammar School, Boston.*

The improvements claimed for this Book over most other Spelling Books in use, are, that the pronunciation of each syllable, and the accent of every word, is precisely known the moment the word meets the eye of the teacher, or pupil. This improvement has been effected by a most ingenious classification of the words, aided by a concise and perfectly simple Key. The Book has been found suited to progressive and intellectual improvement generally, and is peculiarly adapted to the exercises of monitorial teaching.

It is used in all the public schools in Boston; and those states, Vermont and Rhode-Island, which have appointed Commissioners for the selection of Books for the Common Schools of the State, have both adopted this book.

Mr. Pierpont, Chairman of the Boston School Committee, in a letter to the publishers, at the time the book was introduced by the committee into the Boston Schools, says; "I have frequently, as chairman of the committee, had occasion to examine Spelling Books for our Common Schools, but never, until the publication of Mr. Emerson's, has one appeared so far superior to Mr. Murray's, as in our opinion to entitle it to a preference in our schools. But Emerson's, when compared with any, published either in England or this country, has, in my opinion, the preference."

## INTRODUCTION TO THE NATIONAL READER.

A selection of Easy Lessons designed to fill the same place in the United States that is held by Murray's Introduction.

By JOHN PIERPONT,

Compiler of the American First Class Book and the  
National Reader.

This work has been expressly prepared for the purpose of satisfying a want which has long been felt of a suitable book for the middle classes. The style presents a sort of medium between the familiar tone suited to a primary Reading Book, and the more elevated style of a First Class Book. Instructors who have examined it speak in the highest terms of the felicitous manner in which the author has executed his design, and it is fortunate that it has been done by the same hand as the National Reader, as no other could so well observe the necessary gradation of style.

## PRACTICAL AND MENTAL ARITHMETIC,

ON A NEW PLAN,

In which Mental Arithmetic is combined with the use of  
the slate, to which is added a

*Practical System of Book keeping,*

By ROSWELL C. SMITH,

In 1 Vol. 18mo.

*From the Jan. No. for 1828 of the Journal of Education.*

"A careful examination of this valuable work will show that its author has compiled it, as all books for schools ought to be compiled, from the results of actual experiment and observation in the schoolroom. It is entirely a practical work, combining the merits of Colburn's system with copious practice on the slate.

"Two circumstances enhance very much the value of this book. It is very comprehensive containing twice the usual quantity of matter in works of this class; while, by judicious attention to arrangement and printing, it is rendered, perhaps, the cheapest book in this department of education. The brief system of Book-Keeping, attached to the Arithmetic, will be a valuable aid to more complete instruction in common schools, to which the work is, in other respects, so peculiarly adapted.

"There are several very valuable peculiarities in this work, for which we cannot, in a notice, find sufficient space. We would recommend a careful examination of the book to all teachers who are desirous of combining good theory with copious and rigid practice."

## PUBLISHER'S NOTICE.

The number of the Register for 1830, is presented to the public, at an earlier date than in former years, at the earnest request of most of its patrons. In order to effect this object the publisher has been compelled to insert the names of the last year's officers, in those towns that hold their annual meetings after the second Monday in November. Most of the towns make their elections in the month of October, or the first week in November, and where such is the fact, and returns have been made, the Register will be found correct.

No inconvenience is experienced in issuing the Register at this early date, so far as regards the officers of the General or State government, or various public institutions and societies. These, the publisher has aimed to have correct, and he trusts they will be found so by the public. The labour and difficulties attending a work of this kind can be imagined by but few, and errors are unavoidable. This can occasion no surprise, when it is considered, that the compiler is compelled to examine several hundred different manuscripts, many of them indifferently written. To the various respectable individuals who have assisted in furnishing the publisher information and materials for this work, he tenders his profound acknowledgements and gratitude, and solicits a continuance of their favors.

*Liberal Education.*—In the Quarterly Review for April, we find a list of all the principal Colleges in the United States, and the number of Students in each, together with their respective residences.—From this list we have prepared the following table, which shows the number of College students from each state in the Union, and the proportion which this number bears in each case to the population of the State. The population is that of 1830, as estimated in a report presented to Congress at their last session by the committee on public lands.

States.	Students.	Population.	Proportion.
Maine	126	420,000	1 in 3,300
N. Hampshire	119	300,000	1 in 2,500
Vermont	135	280,000	1 in 2,000
Massachusetts	449	580,000	1 in 1,300
Rhode Island	33	90,000	1 in 2,700
Connecticut	191	290,000	1 in 1,500
New York	540	2,000,000	1 in 3,700
New Jersey	96	330,000	1 in 3,400
Pennsylvania	310	1,300,000	1 in 4,500
Delaware	7	80,000	1 in 11,000
Maryland	171	450,000	1 in 2,600
Dist. Columbia	21	5,000	1 in 2,600
Virginia	401	1,180,000	1 in 2,900
N. Carolina	88	720,000	1 in 8,000
S. Carolina	196	600,000	1 in 3,000
Georgia	100	410,000	1 in 4,000
Alabama	31	380,000	1 in 12,000
Mississippi	23	130,000	1 in 5,600
Louisiana	12	300,000	1 in 25,000
Kentucky	141	650,000	1 in 4,600
Ohio	148	1,000,000	1 in 6,700
Tennessee	75	600,000	1 in 8,000
U. States	3,400	12,000,000	1 in 3,800

From the above it will be seen that in New England there is, on an average, one student in college for every 2,000 inhabitants; in the middle States, one for 4,000; and in the States south and west of Pennsylvania, one for 6,000.

## EMERSON'S

### "NATIONAL SPELLING BOOK."

The improvements claimed for this Book over most other Spelling Books in use, are, that the pronunciation of each syllable, and the accent of every word, is precisely known the moment the word meets the eye of the teacher, or pupil. This improvement has been effected by a most ingenious classification of the words, aided by a concise and perfectly simple Key. The Book has been found suited to progressive and intellectual improvement generally, and is peculiarly adapted to the exercises of monitorial teaching.

It is used in all the public schools in Boston; and those states, Vermont and Rhode-Island, which have appointed Commissioners for the selection of books for the Common Schools of the State, have both adopted this book.

Mr. Pierpont, Chairman of the Boston School Committee, in a letter to the publishers, at the time the book was introduced by the committee into the Boston Schools, says: "I have frequently as chairman of the committee, had occasion to examine Spelling Books for our Common Schools, but never, until the publication of Mr. Emerson's, has one appeared so far superior to Mr. Murray's, as in our opinion to entitle it to a preference in our schools. But Emerson's, when compared with any published either in England or this country, has, in my opinion, the preference."
